

## D 2020 226

### EXECUTIVE ORDER

#### **Activating the Colorado National Guard to Assist with Election Cybersecurity Defense Efforts**

Pursuant to the authority vested in the Governor of the State of Colorado and, in particular, pursuant to Article IV, Section 5 of the Colorado Constitution and C.R.S. § 28-3-104, *et seq.*, I, Jared Polis, Governor of the State of Colorado, hereby issue this Executive Order activating up to ten (10) members of the Colorado National Guard Defensive Cyber Operations Element to assist with election cybersecurity defense efforts during the 2020 Presidential election.

#### **I. Background and Purpose**

Like many states, Colorado uses online voter registration systems that allow eligible citizens to access and update their voter registration information. These systems are protected by various security features that maintain confidentiality and prevent data tampering or interference with data.

Even with such security features, online voter registration systems could provide an avenue for cyber actors to gain unlawful access to voter registration databases. Outside of Colorado, voter registration databases have been compromised by cyber actors hacking into various systems. While cyber actors are unable to modify voter records, breaches could result in the release of voters' personally identifiable information. The exposure of voters' personally identifiable information does not threaten the integrity of our State elections, but could undermine public confidence in the system and suppress voter registration. The Colorado National Guard Defensive Cyber Operations Element has unique cyber capabilities to assist in protecting critical election infrastructure.

The Colorado Secretary of State has requested that the Colorado National Guard Defensive Cyber Operations Element provide assistance and support from October 19, 2020, through November 4, 2020, for critical activities associated with the upcoming Presidential election. By activating up to ten (10) members of the National Guard Defensive Cyber Operations Element, the National Guard will support the Secretary of State with election defense efforts up to and including the 2020 Presidential election on November 3, 2020.

**II. Declarations and Directives**

On October 6, 2020, the Colorado Secretary of State requested support from the Colorado National Guard Defensive Cyber Operations Element for the 2020 Presidential election occurring on November 3, 2020. Pursuant to C.R.S. § 28-3-104, the Governor may employ the National Guard for the defense of the State. I hereby activate up to ten (10) members of the Colorado National Guard Defensive Cyber Operations Element to participate in training activities and assist with election cybersecurity defense efforts from October 19, 2020, through November 4, 2020, for the 2020 Presidential election.

**III. Duration**

This Executive Order shall expire on November 4, 2020, unless extended further by Executive Order.

GIVEN under my hand and  
the Executive Seal of the  
State of Colorado, this  
nineteenth day of October,  
2020.

A handwritten signature in blue ink that reads "Jared Polis". The signature is fluid and cursive, with the first and last names being the most prominent.
